

# UNIVERSITY PORTAL SYSTEM

Comprehensive System Optimization & Full-Stack Development Roadmap

**Document Type:** Master Technical Blueprint

**Status:** Action-Ready Blueprint

**Target Architecture:** PHP / MySQL Framework

**Strategic Execution Overview:** This technical document converts your raw portal plan into a structured, production-grade roadmap. The development workload has been categorized into three distinct layers (Student, Teacher, Admin), isolated by module type, and prioritized by systemic dependency. Core functionality (session control, financial calculations) has been prioritized over stylistic elements to guarantee complete application architecture stability.

## 1. STUDENT PORTAL MODULES (FRONTEND & BUSINESS LOGIC)

| TASK REFERENCE | MODULE / FUNCTIONAL SCOPE                 | CATEGORY  | PRIORITY | TECHNICAL IMPLEMENTATION SPECIFICATIONS                                                                                                                                             |
|----------------|-------------------------------------------|-----------|----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| STU-01         | Session Termination & Authentication      | CORE AUTH | CRITICAL | Implement absolute session destruction via PHP <code>session_unset()</code> and <code>session_destroy()</code> . Prevent back-button caching and historical url form-resubmissions. |
| STU-02         | Profile Customization & Security Settings | USER CORE | CRITICAL | Deploy secure <code>setting.php</code> handling password updates using robust <code>password_hash()</code> encryption alongside profile detail updates.                             |
| STU-03         | Academic Evaluation Engine                | LOGIC     | CRITICAL | Build a mandatory dual-phase timeline mechanism allowing exactly one evaluation submission before Midterms and exactly one before Finals. Lock forms upon submission.               |
| STU-04         | Integrated Tuition & Course-Based Fees    | FINANCE   | CRITICAL | Build dynamic runtime calculations based on current course credit hours, department baselines, and custom lab fees.                                                                 |
| STU-05         | Hostel Allocation & Security Deposit      | FINANCE   | MEDIUM   | Develop calculation ledger and generation sequence for hostel security pricing. Track refund capabilities via database flag status.                                                 |

| TASK REFERENCE | MODULE / FUNCTIONAL SCOPE               | CATEGORY | PRIORITY | TECHNICAL IMPLEMENTATION SPECIFICATIONS                                                                                                          |
|----------------|-----------------------------------------|----------|----------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| STU-06         | Hostel Mess & Catering Vouchers         | FINANCE  | MEDIUM   | Generate monthly recurring dining bills. Connect with attendance trackers to account for official vacation or absence waivers.                   |
| STU-07         | Transport Enrollment & Route Fees       | FINANCE  | MEDIUM   | Calculate distance/route fees dynamically based on student route selections. Connect billing status directly to physical transit passes.         |
| STU-08         | Course Management Framework             | ACADEMIC | CRITICAL | Establish structured layouts for assignments, downloads, reading materials, submission status indicators, and deadlines.                         |
| STU-09         | Chronological Semester Grade Connection | ACADEMIC | CRITICAL | Join student tables with multi-semester history using SQL INNER JOIN statements keyed on semester ID to ensure flawless multi-term grade sheets. |
| STU-10         | Global Portal Iconography Refresh       | UI / UX  | LOW      | Standardize and replace current layout icons with clean vector SVG or FontAwesome iconography across the entire portal.                          |
| STU-11         | Grade Book Header Optimization          | UI / UX  | LOW      | Re-engineer grid headers for grade metrics with clean CSS typography, explicit padding guidelines, and absolute layout responsiveness.           |

## 2. FACULTY / TEACHER PORTAL MODULES

| TASK REFERENCE | MODULE / FUNCTIONAL SCOPE            | CATEGORY  | PRIORITY | TECHNICAL IMPLEMENTATION SPECIFICATIONS                                                                                                           |
|----------------|--------------------------------------|-----------|----------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| TCH-01         | Session Management & Access Controls | CORE AUTH | CRITICAL | Deploy unified settings dashboard alongside absolute session teardown logic matching student security protocols.                                  |
| TCH-02         | Attendance Registry Engine           | ACADEMIC  | CRITICAL | Build grid interface for direct database single-date records adjustments, coupled with historical lookup capabilities for the whole semester.     |
| TCH-03         | Grading Criteria Scale Configuration | ACADEMIC  | CRITICAL | Implement adjustable forms for custom weightings (relative vs absolute) across internal marks, quizzes, and exams.                                |
| TCH-04         | Research Review Portfolio & Exports  | RESEARCH  | MEDIUM   | Integrate reliable server-side libraries (e.g., FPDF, TCPDF, or WeasyPrint tools) to generate standardized PDFs for student research evaluations. |
| TCH-05         | Faculty Dashboard Visual Refresh     | UI / UX   | LOW      | Modernize user profiles and structural spacing using professional UI styling rules. Fix form wrapper containers.                                  |

## 3. ADMIN PORTAL & CENTRAL INFRASTRUCTURE MODULES

| TASK REFERENCE | MODULE / FUNCTIONAL SCOPE          | CATEGORY | PRIORITY | TECHNICAL IMPLEMENTATION SPECIFICATIONS                                                                                                          |
|----------------|------------------------------------|----------|----------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| ADM-01         | Unified Fee Ledger System          | FINANCE  | CRITICAL | Consolidate student billing across all units (University tuition, hostel rooms, mess hall, transit accounts) into a single system table.         |
| ADM-02         | Penalty & Fine Allocation Engine   | FINANCE  | CRITICAL | Build manual/automated invoice tracking for late submissions, attendance shortages, or property damage fines with clear ledger histories.        |
| ADM-03         | Course Recovery & Enrollment Logic | ACADEMIC | CRITICAL | Detect D/F failing grades. Automatically prompt eligible students with summer/re-take options, compute per-subject fees, and process enrollment. |

| TASK REFERENCE | MODULE / FUNCTIONAL SCOPE             | CATEGORY  | PRIORITY | TECHNICAL IMPLEMENTATION SPECIFICATIONS                                                                                                |
|----------------|---------------------------------------|-----------|----------|----------------------------------------------------------------------------------------------------------------------------------------|
| ADM-04         | Dynamic Faculty Mapping & Allotments  | ACADEMIC  | CRITICAL | Map courses to available instructors within specified departments while verifying structural integrity in your relational database.    |
| ADM-05         | Advanced Student Query Directory      | DATA      | MEDIUM   | Build robust tabular filter controls searching student records by specific Class, Section, and active academic Semester.               |
| ADM-06         | Official Transcript Verification Desk | DATA      | MEDIUM   | Develop audit screens to cross-reference academic records, verify clear financial balances, and issue secure verification tokens.      |
| ADM-07         | Faculty Feedback Analysis Hub         | ANALYTICS | MEDIUM   | Aggregate quantitative student evaluations into descriptive metrics dashboards for administrative review.                              |
| ADM-08         | User Registration Subsystems          | UI / UX   | MEDIUM   | Redesign student and faculty enrollment workflows to introduce input validations, real-time error handling, and clean form styling.    |
| ADM-09         | Admin Master Panel Refresh            | UI / UX   | LOW      | Clean up control panel layout, profile widgets, grid displays, and navigational elements for an exceptional administrative experience. |
